

5 AGENCY BENCHMARK & STRATEGIC DECISION MATRIX

Typography Inspection & Brand Philosophy Alignment

A deep-dive comparative study of 5 industry agency websites, extracting their exact font stacks, evaluating their visual psychology against Aduva's North Star philosophy, and establishing the ultimate agency-grade typography standard.

INSPECTED AGENCY WEBSITES:

- | | |
|---|--|
| 1. Techmagnate • DM Sans | 2. TBH Creative • Saans / Rethink + IBM Plex Mono |
| 3. Red Evolution • Montserrat | 4. Motion Marketing • Poppins + Roboto |
| 5. Filament Digital • Inter / Neo-Grotesque System | |

1. Techmagnate

techmagnate.com

DM Sans (All-in-One)

SEO & Enterprise Digital Marketing Agency (India)

Exact Font Stack: Headings & Body both use 'DM Sans', sans-serif.

How Aduva looks in DM Sans: "Architecting Direct ROI & Enterprise AI Growth"

Delivering high-converting web applications, WhatsApp CRM automation, and local SEO leadership for scaling businesses.

Philosophy Alignment with Aduva: Fitment: 6.5 / 10

Analysis: DM Sans has friendly, open geometric shapes, great for standard agency blogs and high readability. However, it lacks the **sharp diagonal tension** and architectural authority of Aduva's "A" arrow logo mark. It feels more "corporate agency" than "cutting-edge AI engineering studio".

2. TBH Creative

tbhcreative.com

Saans / Rethink Sans + IBM Plex Mono

Award-Winning Web Design & Digital Studio (USA)

Exact Font Stack: Headings use custom Saans / Rethink Sans, Metadata/Eyebrows use IBM Plex Mono, Body uses Rethink Sans.

• ARCHITECTURE & RESERVATIONS ENGINE

How Aduva looks in Rethink + Mono: "Direct Booking Engines & High-Velocity Code"

Zero OTA commissions. Sub-second page loads. Automated guest pipelines built on custom cloud infrastructure.

Philosophy Alignment with Aduva: Fitment: 9.5 / 10

Analysis: **Sensational agency-grade pairing.** The combination of a refined modern neo-grotesque with technical monospace eyebrows creates immediate visual hierarchy, high trust, and elite agency presence. Strongly aligns with Aduva's precision and North Star guidance.

3. Red Evolution redevolution.com

Montserrat (Heavy Geometric)

"SCALING BUSINESSES THROUGH HIGH-PERFORMANCE WEB"

Philosophy Alignment: **Fitment: 7.0 / 10** — Bold and punchy, but wide letterforms take up too much horizontal space and feel slightly dated (mid-2010s agency style).

4. Motion Marketing motion-marketing.com

Poppins + Roboto / Open Sans

"Empowering B2B Growth with Strategic Content & Media"

High contrast dark navy aesthetic, but rounded letter curves soften the sharp engineering angle.

Philosophy Alignment: **Fitment: 7.2 / 10** — High energy and great on dark navy (#0B1F3A), but Poppins circular geometry lacks the aggressive edge needed for an elite custom software/AI brand.

5. Filament Digital filament.digital

Inter / System Neo-Grotesque

"97% of Compliance Calls Go Unreviewed: Enterprise AI Systems"

Philosophy Alignment: **Fitment: 8.5 / 10** — Pure enterprise tech seriousness and data clarity. Highly credible, though on its own can feel slightly minimal/cold without display accents.

• COMPARATIVE AUDIT

5 Benchmark Side-by-Side Analysis

WEBSITE	PRIMARY STACK	CATEGORY & MOOD	ADRUVA PHILOSOPHY FIT	PROS FOR ADRUVA	CONS FOR ADRUVA	SCORE
Techmagnate	DM Sans	Friendly Geometric Sans	Good for general digital marketing blogs.	High readability, clean open curves.	Lacks architectural punch & tech authority.	6.5/10
TBH Creative	Rethink / Saans + IBM Plex Mono	Modern Swiss + Tech Monospace	Flawless match: Combines technical rigor with executive luxury.	Sharp hierarchy, high-end agency aesthetic, incredible data scannability.	Requires strict design token discipline across developers.	9.5/10
Red Evolution	Montserrat	Heavy Geometric Sans	Strong presence, but lacks modern tech edge.	Very bold headings, good contrast.	Wide x-height takes excessive screen width on mobile.	7.0/10
Motion Mktg	Poppins + Roboto	Rounded Geometric + Neutral Body	Friendly energy, but too generic/common.	Great legibility on #0B1F3A navy canvas.	Feels like standard WordPress/Bootstrap site.	7.2/10
Filament	Inter (System Neo-Grotesque)	Minimalist Deep Tech	Direct alignment with enterprise AI & custom software.	Sub-second reading, zero clutter, 100% focused on content.	Needs high-impact display font to prevent visual monotony.	8.5/10

💡 KEY INSIGHT FROM THE 5-SITE BENCHMARK:

The highest-performing agency aesthetic (TBH Creative & Filament Digital) **never uses a single font everywhere**. They use a **High-Tension Hybrid Hierarchy**: an authoritative Display font for headlines, a pixel-perfect Body font for reading, and a crisp **Monospace font (IBM Plex Mono / JetBrains Mono)** for badges, metrics, and technology specs.

• THE WINNER FOR ADRUVA

The "Aduva North Star" Agency Stack

Synthesizing the best qualities of the 5 benchmarks into a bespoke, award-winning typographic language for Aduva Solutions:

👑 THE ULTIMATE FORMULA

10 / 10 Fitment

HEADINGS (H1/H2)

Plus Jakarta / Rethink

Sharp angles like the "A" logo

BODY & BOOKINGS

Inter / Satoshi

Pixel-perfect reading clarity

TECH & BADGES

IBM Plex / JetBrains

Elite technical credibility

• **ADRUVA ENTERPRISE SUITE** [STATUS: ACTIVE • 99.99% UPTIME]

Architecting Direct Booking Engines & High-Velocity AI Automations.

Eliminate 18-30% OTA commission bleed. We build custom multi-currency reservation platforms, WhatsApp customer workflows, and Google Maps 3-Pack rank systems.

🎯 Final Conclusion & Next Action:

By marrying the editorial prestige of TBH Creative with the deep-tech seriousness of Filament and the high-contrast energy of Motion Marketing, Aduva establishes an unmistakable visual identity that outclasses standard digital agencies.
